

Park East Subdivision Homeowners Association, Inc.

Assumptions for Proposed 2014 Budget

Irrigation Repairs and Maintenance: Budgeted \$6,000 for repair/replacement of damaged heads and/or lines and the labor to do the work, based on discussions with contractor and experience in 2011/2013 with a potable water system. Assume irrigation repairs or improvements through November 2014. These would largely be adjustments to head placements, and clock and zone valve wiring not completed in 2013. The irrigation company would be contracted only for repairs to system, summer cleaning of sprinkler heads as necessary, and turning the system on/off. **Increase of \$1000.**

Water Expense-this is a line item representing the flat fee charged to all owners for water provided to the street rights of way (area between sidewalk and street), and does not include the expected expense of water for the entryway common areas, which is billed to the developer. Expense is based on 2013 actual expenses and no expectation or indications at this time of an increase in water rates (\$2.66/1000) gallons from the City. **Decrease of \$1500.**

Landscape Maintenance: Approximately April 15 - Oct 15

The contract is proposed for \$1800 during the landscaping season, about \$80 per week. The expense is based on hiring a landscape contractor to maintain the appearance of the entry, entry plant bed, and both culs de sac, including mowing, fertilization, weed control and irrigation adjustment. Also included would be spring clean up of these areas, and fall pruning of shrubs and perennials. Not included is the mowing and maintenance of tract 1 and tract 2, (entry areas on either side of Sky Ranch Drive) still owned by Park East Development. **No change.**

Tree and Shrub Replacement: Allow \$600.00 for replacement of trees in Conservancy Park as discussed with City in 2013. City of Glenwood has made replacements and prunes right of way trees in 2010-2013. **Increase of \$600.**

Roaring Fork Conservancy: this fee is an annual obligation of the PESHOA, and helps pay for preservation of the entire Roaring Fork River basin, from the upper Roaring Fork, Crystal and Fryingpan rivers to the confluence with the Colorado at Glenwood. The Park East Board and the Conservancy agreed to a significant reduction in expense for 2010, continuing into the future. Per actual 2013 expense, with allowance for cpi increase. **Increase of \$185.**

Insurance: Insurance expense is set at \$2221 for 2014. Package policy from Community Association Underwriters, with Neil Garing as local agency. Included are Directors & Officers Insurance, and General Liability Insurance, Premises Medical coverage, Fidelity Bonding. Year one of a new three year contract. **No change.**

Management Services: This includes all association operations, accounting services and administration, maintaining records for and attending Board meetings. Attending DRC meetings and DRC administration, insurance coverage and claims. Services also include having the manager on-site on a regular basis to oversee landscape, irrigation and Design Review matters and other contracted services. Owner contact for all HOA issues and others related to local zoning or other ordinances, and interface with City services. **No change.**

Legal Expense: legal expense is decreased for 2014 from 2012. There is still some expectation of 2014 legal expense in regard to the Roaring Fork Conservancy expense to the HOA. **No change from 2013.**

Tax Preparation:

The cost for Federal and State Income Tax preparation is estimated at \$225.00 based on 2013 expense. **With change of vendor in 2013, decrease of \$25.**

Office Expense/Supplies:

Office expense is budgeted at \$30--35.00 per month, based on 2011 - 2013 expenses, which included the expense of lien filing and recording fees. Account also includes any check stock or deposit slip purchases, bank charges, copy expense, postage and paper for mailings. **Decrease of \$140.**

Miscellaneous Expense (Association Meetings):

Expected expense for Association meetings each year, including costs for refreshments, set-up charges, venue rental etc., based on 2013 actual expenses, which included a summer community picnic, which is expected to be repeated in 2014 . **Increase of \$100.**

Sewer Lift Reserve Contribution

Charged only to those owners whose lots are serviced by the lift station. This addresses the expense of electric service and maintenance checks. It serves to insure there are adequate funds to repair either of the two submersible pumps, the electrical panel, or other necessary repairs or replacements. A backup replacement pump has been purchased in 2010 to facilitate timely repairs when a pump goes down. This reserve account seems adequately funded, and no charge for participating owners is proposed. **No change.**

General Reserve Contribution

A general reserve amount is charged to all owners for unforeseen expenses, association improvements and contingencies. This reserve fund may be used at direction of the Board to address operations budget shortfalls due to uncollectible assessments or unforeseen expense in the operations budget. Its primary use should be for capital improvement projects. Suspended for 2011, 2012, 2013 and 2014 by Board action in response to present reserve fund balance and economy. **No change.**

Each \$1000 change in the operational budget line items above raises or lowers assessments by \$1.01 per month or \$12.12 per year per home

Non-operations budget items

Design Review fees: This line item is not included in the calculation of operating assessments, since these fees are paid by an applicant wishing to build a home. The budget needs to recognize this income in order to pay service contractors fees related to design review operations and expenses (administration, irrigation system alterations). However, the number of applicants (0) proposed in 2014 is an estimation. Actual funds collected will depend on how many homes start construction in 2014. There are only 6 lots left to build upon in Park East. **No change.**

Trash removal/recycling: Also not included in the calculation of operating assessments, since not all Park East owners have trash service. Addresses the expense of trash removal and recycling for most homes in Park East, and based on number of homes serviced (currently 69 homes at \$19 per home per month, with a new contract which may be impacted by passed along land fill fees). Service added during the year for a new home is billed directly to that owner the month their service begins. Owners are billed \$19 per month, \$228 per year. **No change.**

Note:

Owners in 2014 should all be permanently disconnected from the common irrigation system and watering their landscape with metered water from their homes. Owners will remain responsible for damages they may cause to the common system by improper disconnection and/or seasonal blow out of home systems. Back-flow prevention devices are also to be checked by service professionals each year.
